

# 8050 & 8055 Hydraulic Handpump 200/345 bar

- *Maximum pressure 200/345 bar*
- *Fine pressure adjustment*
- *Easy maintenance*
- *Pressure media: oil, water and alcohol*

Pressure indicator is not included.

*The Model 8050 & 8055 Hydraulic Handpumps are high pressure pumps with an integral test (gauge) fitting and a long stroke fine adjustment piston. Internal parts are brass, aluminium and stainless with Buna N 'O' rings. The fluid reservoir is lexan. Oil, water and alcohol can be used with this pump.*

*The Model 8050 & 8055 Hydraulic Handpumps have a pressure relief valve in the fill plug to prevent back pressure damage. The check valves can easily be removed for cleaning. A hanging ring permits hands-free operation. A check valve in the outlet fitting eliminates leakage during storage. All these unique features increase the usefulness, dependability and safety of the Model 8050 & 8055 Hydraulic Handpumps.*

*The simple, easy maintenance design of the Model 8050 & 8055 Hydraulic handpumps will give years of trouble free service.*

# Technical specifications

## **Ordering code**

Maximum pressure 200 bar (3000 PSI) : Model 8050

Maximum pressure 345 bar (5000 PSI) : Model 8055

## **Materials of construction**

Internal parts : brass, aluminium and stainless steel

Fluid reservoir : Lexan

'O' rings : Buna N

## **Pressure media**

Oil, water or alcohol

## **Test connection**

1/4"NPT

## **Supply includes**

- Pump
- Hose
- 1/4"NPT adaptor

## **Optional**

- 8052 connection set
- 8051 Hydraulic handpump, model 8050,  
maximum pressure: 200 bar  
Including high pressure test hoses Minimes1215
- Digital Pressure Indicator
