

Ultra-Miniature Load Cell

MODEL 8416

Option Non-linearity ≤ ±0.15 % F.S.

Model 8416 original size

Highlights

- Measuring ranges from 0 ... 20 N up to 0 ... 5 kN
 0 ... 4.5 lbs up to 0 ... 1124.0 lbs
- Dragchain cable
- Inexpensive
- Minimum diameter

Options

- burster TEDS
- Temperature compensated range -40 °C ... +90 °C
- Standardization of the nominal sensitivity
- Connection cable from single strand

Applications

- Equipment construction
- Production lines
- Measuring and control equipment
- Testing systems
- Handling gear

Product description

Due to their extremely compact design, these load cells can be used wherever static or dynamic load forces have to be measured in very tight spaces.

Model 8416 is perfect for use in micro-technology and just as suitable for measuring tasks in the research and development sector.

The ultra-miniature compression load cell model 8416 is a flat, circular disc, the bottom of which is sealed with a cover. The load application button for receiving the compression forces is an integrated part of the sensor.

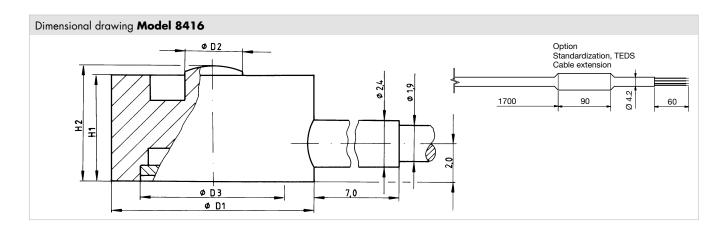

The sensor element inside the body carries a strain gage full bridge which outputs voltage directly proportional to the measurement variable upon application of force.

The short nominal measurement distance of the ultra-miniature compression load cells due to their design provides a high degree of rigidity. If needed, the nominal characteristic value can be standardized in the sensor connection cable. This allows for quick and easy interchange or simultaneous connection of several sensors to a single evaluation unit.

| Mounting | |
|-----------------------|---|
| Mounting instructions | The measurement force must be introduced centrically and without any lateral forces. To prevent contact at just a few points, ensure that the sensor is installed on a flat surface. |
| | The sensor can be secured, for example, with silicon, wax or adhesive cement. Do not subject the sensor to lateral clamping forces as these would lead to measurement errors. |
| | When handling and installing the sensor, ensure that the cable outlet and sensor cable are not subject to excessively high tensile or lateral forces. Strain relief may be necessary. |

Electrical termination

Output signal

burster load cells are based on a strain-gage Wheatstone bridge. This measurement principle means that the output voltage mV/V is highly dependent on the sensor supply voltage. Our website contains details of suitable instrumentation amplifiers, indicator and display devices and process instruments.

Connectors and units

Order code

| Connectors | |
|--------------------|--|
| 9941 | Connectors 12 pin, suitable to all burster desktop units |
| 9900-V209 | Connectors 9 pin, suitable to SENSORMASTER, DIGIFORCE® and TRANS CAL |
| 9900-V229 | Connectors 9 pin with TEDS |
| 9900-V245 | Connectors 8 pin, suitable to ForceMaster |
| Units | |
| 7281-V0001 | Mobile measuring device with strain gage simulator and sensor test (R _i , R _a , Shunt, R _{ISO}) |
| refer to section 9 | Sensor electronics, amplifier and process control units like digital indicator model 9180, model 9163, modular amplifier model 9250 or DIGIFORCE® model 9307 |

Calibration

| Test and calibration certificate | | | | | | | | |
|---|--|--|--|--|--|--|--|--|
| Included in scope of delivery of sensor | Amongst other data, includes figures for zero point, full-scale output and calibration offset | | | | | | | |
| Standard factory calibration certificate for load cells or measurement chains (WKS) | | | | | | | | |
| Optionally available | Our standard factory calibration certificate includes 11 measurement points, starting at zero, spread evenly in 20% steps over the full measuring range, for increasing and decreasing load under the same installation conditions. | | | | | | | |
| Special factory calib | ration certificate for load cells or measurement chains (WKS) | | | | | | | |
| On request | We are happy to calibrate sensors and measurement chains to the customer's specification. | | | | | | | |
| German-accredited [| German-accredited DAkkS calibration certificate for sensors and measurement chains (DKD) | | | | | | | |
| Optionally available | Our DAkkS-certified calibration laboratory provides calibration certificates to DIN EN ISO 376. The calibration certificate includes 21 measurement points, starting at zero, spread evenly in 10% steps over the measuring range, for increasing and decreasing load under various installation conditions. DAkkS calibrations can be performed in the compression and/or tension direction depending on the sensor type. | | | | | | | |
