

8284 Gauge Test Station

- ✓ **Low cost**
- ✓ **Rugged design**
- ✓ **Easy operation**

The model 8284 is a robust station for testing pressure gauges. This standard has proven to be very practical in numerous test set-ups. Supplied with 1/2", 3/8, 1/4" and 1/8" BSP gauge adaptors which can be "stores" on the base plate of the Gauge Test Station.

A Tradinco Dirt Separator Model 2525 (not shown in the picture) can be fitted onto the Gauge Test Station to protect instruments against corrosion and dirt.

Tradinco Instruments distributes, designs, manufactures and repairs calibration, sensing equipment and instruments for various industries.

Our core values are quality, service and keeping our knowledge up to date with the latest technical innovations.
