New
TM35

14 different measurement
ranges

Up to 90 bar

The TM35 digital pressure gauge is a table top pressure-measuring instrument with an integrated pressure sensor for the measurement of differential, relative or absolute pressures.

- 14 different measurement ranges available up to 90 bar (high overload resist)
- Relative-, differential- or absolute pressure
- Accuracy up to 0.05% F.S.
- Temperature compensated 0 to 50 °C
- Long-term stability < 0.05% F.S. / year
- 22 selectable units of measure
- USB Interface / Windows software (optional)
- Powered over USB (max 80mA) / Battery operated
- Easy and fast start of operation
- Graphic display with high resolution and backlight
- Manually fine-tuning adjustment (0.5 l internal volume (up to 1 bar))
- Air, none aggressive gases and all media port compatibility

Field of application:

Medical Technology, Pharmaceutical Industry, Chemical and Petrochemical Industry, Laboratories and Universities, Diagnostics
