- Brightness ..... 5 levels of brightness intensity.
- Password ..... blocks access to configuration menu.

## Application example

Measure of current consumption on an AC engine measured through a standard X/5 current transformer, and measure of the 230 Vac voltage level of the power line. A first relay output signal the excessive consumption for operator intervention. A second relay output controls the power cut-off in case of critical consumption. Retransmission of the reading value to a remote SCADA of PLC unit through an isolated RS-485 bus.

## Alarms example

Alarms with one setpoint, configurable deactivation hysteresis, independent activation and deactivation delays.

## Double setpoint alarms

Alarms with double setpoint, configurable as maximum or minimum, allow to create activation or deactivation windows..
