

## TRU-LOKT™ BUCKLE

*Take the guesswork out of tensioning!*

Finding that “just right” tension with traditional buckles is a time-consuming and inconsistent process, leading to over-tightening, under-tightening, and wasted resources from things like cracked bands. This impacts installer productivity and ultimately, your bottom line. BAND-IT’s Tru-Lokt buckle offers a solution for faster, more reliable, and consistent fastening!

### Features & Benefits

- **Eliminate The Guesswork:** Buckle wing collapses, running parallel upon proper band tension
- **Install Faster, Finish Sooner:** Reduce installation time by 50%
- **Easier to Use:** With no backwinding required; reach proper tension and simply roll over!
- **‘Meets Requirements’ Every Time:** Retained force lower limit always above commonly desired min of 200lbs
- **Use Existing Tools:** Compatible with C00169 standard banding tool and the Drill Accessory Banding Tool

**C25699TL**  
3/4" 201 SS Buckle

### The cost of “eyeing it” over a year

	Legacy Buckle	TRU-LOKT
Time per installation	40 seconds	<b>20 seconds</b>
Cost per year	\$12,600.00	<b>\$6,200.00</b>
TOTAL SAVINGS		<b>\$6,400.00</b>

Assume hourly wage of technician is \$25.00/hour, with 10 technicians and an average of 30 installations per technician daily  
This is an estimate based on market research and industry information. Data may vary with location and other factors.

### USE WITH:

- C001DA:** Drill Accessory Banding Tool
- C00169:** Standard Banding Tool
- C20699 & C206R9:** 201 SS 3/4" Banding

**C25699TL** 3/4" 201 SS Buckle
